## innovation & quality

Italy: a nation renowned for its food, its beautiful cars, the classical architecture, sartorial style, its engineering innovations, its artisans and its craftsmen. Little surprise then that in the world of bathroom design we find the same dedication to beauty and hand crafted quality.

Ceramica Flaminia, situated in the district of Civita Castellana, began manufacturing ceramic bathroom fixtures 60 years ago. All the stages of product development – from prototype construction to the finishing stage – are carried out in-house. World famous designers work closely with the Flaminia team. They see how their ideas come to life, always on hand throughout a manual production process typical of a craftsman's workshop.

Every concept develops under the loving care of experts committed to delivering high-end, sculpted pieces that consistently achieve the reputation of design icons. Efficiency, quality, ongoing research and innovation make the Flaminia trademark one of the most prestigious ambassadors of Italian know-how, well known and appreciated around the world.

### by design

Today, Flaminia works with artists from different backgrounds, drawing their inspiration from diverse cultures and traditions, to reinterpret ceramics in bathroom design.

More and more these days, people prefer to mix different products to create a home that reflects their personality. Hence the company's ongoing search for prominent designers with innovative ideas and a recognisable style. Flaminia brings them all together – from minimal to organic, rational to artistic – relying on their intimate feel for the material.

In addition, we dedicate much of our energy to the development of solutions that can support and give shape to the creativity of the designers, as well as make it possible to realise highly complex projects. Invariably, the result is a new breakthrough in terms of the aesthetic and functional potential of ceramic.

## go**clean**®

Self-cleaning surfaces, non-iron fabrics and appliances that self-clean; the list of easy solutions to household chores gets longer and longer with each passing day contributing to a more relaxed and easier daily life.

The bathroom is one of the rooms where cleaning is particularly relevant to ensure that shower enclosures, ceramic surfaces, taps and showers are always cleaned and checked every day.

Flaminia has introduced an innovative technical solution specially designed to help clean effortlessly and make the best use of time; the go**clean**.

We have eliminated the rim to make the toilet bowl entirely visible leaving no hard-to-reach hidden areas to allow easy cleaning. A controlled amount of water (between 4.5 litres and 6 litres as required by regulatory authorities) ensures greater hygiene and ease of use than traditional systems - two features of vital importance in any private or public bathroom.

In addition to a toilet bowl that is easy to clean due to the rounded surfaces (all it takes is a simple wipe with a sponge) goclean features smooth lines and a pleasing appearance. It differs from any other WC in that it has no added elements and the inside of bowl is perfectly smooth thereby enhancing the practical and aesthetic value of the toilet. The controlled flushing also meets water saving needs.

This remarkable solution is currently applied to the App, Bonola, Link and Pinch collections and will become available on other Flaminia ranges; a further confirmation of the company's ability to reconcile attractive design and flawless performance.

go**clean®** 

the system designed by Flaminia that makes toilet cleaning, simple and rapid

# plus system

The Link, App, and Quick back to wall pans are now available with Flaminia's Plus drainage system. Created specifically for back to wall pans, this system adapts easily to even the oldest existing drainage installations, providing a simple solution for bathroom renovations. Combining different bends and connectors, the Plus can be used for floor drainage installations between 5 and 33cm from the wall. You will need to measure the distance from the wall to the centre of the existing trap, and then order the pan of your choice and the drain pipe set suitable for the measurements taken. The following products are available with Flaminia's Plus drainage system:

App Plus AP117RG See page 19

Link Plus LK117RG See page 61

Quick Plus QK117RG

See page 88

### CONNECTIONS SET FOR FLOOR DRAIN

To use the **Plus** system wcs you need to measure the distance from the wall to the center of the existing trap then order the pan of your choice and the drain pipe set suitable for the measurements taken.

## mix & match

Our customers seem to prefer mixing different products to create a home that reflects their personality. We like this.

13 \_\_\_\_

## in colour

Working with ceramic does not mean solely giving shape to the material, it also means working on colours and textures to obtain ever new and striking effects.

> Making use of matt and glossy colours and different textures in order to enhance the value of a product is a key design factor: a product can be rendered eminently attractive, and differ both visually and in terms of the sensations evoked, which may even be unexpected.

Colour has always been a focus of design work at Flaminia, which continues experimenting with new matte hues like Nuvola and Fango, inspired by the colours of nature, and has defined new, textured surfaces, like Bronzo and Ghisa. The latter two react to the light with ever changing effects, a typical characteristic of the metals - Bronze and Cast Iron - they were inspired by.

Our products are supplied in Glossy White as standard and we have indicated which colours are available in each range along with the price. We also have products available in Metallic finishes and Bi-colour finishes in some ranges, these are illustrated where available within our brochure. When selecting colour products please note that these have longer lead times than the standard Glossy White. See colour swatches on page 162.

## bloom

The generous geometric proportions and the very thin profile of the Bloom basin create a pleasing and refined contrast with the soft, round shape of the interior bowl. Available in four sizes, this wall hung basin can be used alone, paired with a stainless steel wall hung frame, or placed atop Bloom furniture as a console basin.

#### Basin colours available

### doppio zero

Doppio Zero is a basin that feels comfortable to use. The rippled rim resembles a cake pan, a deceptively simple shape inspired by the 1970s, with a fondness for their floral, decorative patterns.

In addition to the standard Glossy White the following colours are available for this range:

### **Doppio Zero** DZ46L

Doppio Zero countertop basin **£256.00** - Colour £397.00 NOTE - Requires PLSG or PLCE waste (see p. 107)

## efi

Efi is a sanitaryware range that recalls the elegant and refined lines of old English production. A Flaminia classic, an ideal solution for warm and traditional bathrooms. Unexpectedly versatile and dynamic: revised and combined with modern materials and decorative elements. A pleasant solution for a contemporary style, half way between the minimal and the new baroque style.

1.1

In addition to the standard Glossy White the following colours are available for this range:

# monowash

Monowash is a basin created in a single ceramic block. The shape of the tank, square with rounded corners, and spine, slightly smaller at the bottom, make it a precise geometric element but with soft shapes.

In addition to the standard Glossy White the following colours are available for this range:

#### Monowash MW40P

Monowash wall column basin **£1,611.00** - Colour £2,497.00

#### Monowash MW40C

Monowash free standing column basin **£1,611.00** - Colour £2,497.00

# nile

The new Nile Collection is a result of the ongoing collaboration between Flaminia and Norguet which began in 2007. It is the outcome of the strong bond between the designer and the manufacturer.

Min

# nuda

The Nuda range of wide basins available in three different sizes, with or without a tap ledge, can be installed in pairs, wall hung or bench mounted. The Nuda Slim and Nuda Flat features lighter proportions and a 'younger' aesthetic appeal, that suits today's urban setting in which space is the real luxury.

Built on a passion for continuous innovation, and delivering top quality, yet simple solutions, Alca's primary aim is to make the lives of their customers easier. On this basis, they have developed frame solutions for every imaginable scenario, including systems with forced air ventilation, cisterns that conserve water, options for people with reduced mobility, and much more. Additionally, each of their beautiful flush plates are compatible with all frames in their comprehensive range, and have been developed for a tool-free installation.

Founded in 1998 as a Czech family-run business, Alca now exports to more than 40 countries and has positioned itself as the largest manufacturer of sanitary ware in Central and Eastern Europe. Their careful consideration for detail, paired with the premium quality of their product, has made Alca a multi-award winning company that we confidently recommend to accompany to our Flaminia pans.

The "Ceramics of Italy" mark is reserved exclusively for Italian-made ceramic products. "Made in Italy" is much more than an indication of geographical origin. It enshrines for a set of values recognised the world over, including quality, transparency, leadership in design, innovation and environmental sustainability. These values, which have been the hallmarks of the Italian ceramic industry since the 1970s, are now embodied in the Ceramics of Italy mark used to represent Italian ceramic tile, sanitaryware and tableware manufacturers belonging to Confindustria Ceramica in global markets.

All prices quoted exclude VAT

Davroc & Flaminia reserve the right to change product specifications, sizes and colours available. Please note that non-standard colours will require longer lead times.
